Statement

Ceramic is such an enchanting area which has numerous creative possibilities. My practice has developed using a combination of professional skills alongside fundamental knowledge of materials. The rich history and traditional skills drive my creativity, embracing interdisciplinary approaches in contemporary ceramics, I explore unconventional and unique expressions in clay. To contemplate the area between function and non-function, my main objective is to create intriguing objects which create discourse between the object and the viewer, whilst maintaining an interesting and unusual aesthetic. My work is versatile and boundless which destroys the territories between Craft, design and Art.
